TRUE MULTIPHASE PUMPING FOR UNDER \$100K

MULTIPHASE TRANSFER PUMP

Directly descended from our highly successful HCG product line, the Multiphase Transfer Pump (MPTP) delivers liquid rates up to 16,000 bpd (2660 m³/d), continuous gas volume fractions up to 100% and ΔP of up to 350 psi (2415 kPa).

	Twin Screw Multiphase	CCI Multiphase
CAPEX	\$2,000,000	\$400,000
Rental Available	No	Yes
Availability	Months	Weeks
Power Cost	\$230,000/yr	\$90,000/yr
Overhaul	\$300,000/unit	Included in NHSP
Maintenance	\$12,000/yr	Included in NHSP
Repair Time	Days / Weeks / Months	Hours
Pump Efficiency	40%	>90%
Redundancy	1 primary, 1 spare	4 primary, 1 spare (or none!)

Engineered For Economics

The MPTP offers increased performance, reliability and profitability with no hassle:

- Simplify gathering facility / satellite design
- Replace aging and maintenance intensive infrastructure
- De-bottleneck field gathering systems
- Increase oil and gas production from wells
- Deploy where the greatest benefit can be attained
- Eliminate the need for redundant systems
- Available for purchase or rental

Keeping economics and reliability in mind, our unique **No Hassle Service Plan (NHSP)** combines service and **real-time monitoring** for a budget-friendly fixed annual fee. Operators can view operational and performance data through our web-based SkyView portal. Routine **maintenance, performance enhancing upgrades, repairs and overhauls** are **all included with the NHSP** to ensure peak performance and uptime.

We are THE experts in delivering No Hassle <100 hp oilfield compression solutions.

Based in Calgary, for nearly **20 years we have been providing innovative**, and economical hassle free compression solutions to oilfields across Canada and abroad. With **5 standard product lines**, we have packaged over 1200 compressors for a variety of applications.

In addition to innovative packaging of conventional oil flooded screw, blower, vane and reciprocating compression elements we engineer special purpose compression elements to provide more **economic and durable oilfield compression solutions**. One of the best examples of our know-how is our **award winning HCG (Hydraulic Casing Gas) compressor**. With its ability to process liquids together with gas, nearly **800 HCG's have been installed** since its introduction in 2015.

What **solution can we provide** for you today? Visit our website at www.compactcompression.com to learn more, sign up for our **quarterly newsletter**, or arrange an information session with your team. In the Calgary area? Book a **tour of our facility** and see practical innovation at its finest.

CASING GAS COMPRESSION • MULTIPHASE FLUID TRANSFER • WELLHEAD COMPRESSION • VAPOUR RECOVERY • PIPELINE SERVICE - EVACUATION AND PIGGING
